

AS/NZS 61439 COMPLIANT

The 'DB Ultimate' range of competitively priced distribution boards are exclusive to APS Industrial, purpose-built for compatibility with Siemens circuit breakers, AS/NZS 61439 compliant and feature an enclosure by the world's leading supplier of innovative enclosure technology, Rittal. Combining the shared expertise and experience of these leading global manufacturers that also draws on KATKO switching technology and Weidmüller surge protection, the 'DB Ultimate' sets the benchmark for quality, flexibility, compliance and intelligence. Contact APS for more information.

SIMPLE, PRECISE AND SAFE

Enerpac's LGH-Series Pullers, which come in compact, easily handled mechanical and powerful 700-bar hydraulic versions offer a secure grip for safe and easy operation. Its synchronous jaw movement enables the entire pulling job to be performed by a single operator. For example, an oil and gas company had difficulty removing the coupler from the drive shaft of a frac pump. With an Enerpac Hydraulic Puller, they went from over an hour of heating and hammering, to 15 minutes of trouble-free operation. They were also pleased that the jaws would hold onto the coupler after pulling it off, without dropping it on the ground. Contact Enerpac for more information.

NOW AVAILABLE IN AUSTRALIA

Canadian Solar's new 5kW single phase residential inverter was designed and manufactured by the company itself. It has made a significant investment into the R&D of the inverters so you can relax knowing that the new range meets its high standards of quality and durability. The range of inverters come with five, plus five years free standard warranty and one of the best service rebates on the market, making it the perfect partner for Canadian Solar panels. The products are available now in Australia. Contact Canadian Solar for more information.

HAVING TROUBLE OPERATING YOUR SEMI CON SCORER IN COMPACT SPACES?

Introducing the new US15, a versatile tool capable of performing slit, ring, and spiral cuts on cable diameters from 10 to 60mm. Equipped with a hardened steel blade, the tool provides fast, safe, and precise jacket removal from both hard and soft insulated cables without damaging the underlying layers. Equipped with a safe, recessed blade to prevent potential injury or blade damage. Easily adjust the blade position to perform ring, spiral and longitudinal cuts as required. Quickly adjusts to suit hard and soft insulated cables with 10mm-60mm diameters on cable ends and 10-50 mm on cable mid-spans. Contact DT Jointing Solutions for more information.

FULLY RUGGED TABLET

Getac's next-generation K120-EX fully rugged tablet combines advanced versatility with superior performance for optimal productivity. Efficient asset and workforce management are both key aspects of the utilities industry; however, they can be challenging to achieve from the field without the right devices and applications. The new K120-EX tablet delivers more power, more connectivity, and more convenience than ever before, in a fully rugged form. With ATEX and IECEx Zone 2/22 certification, it offers powerful computing for use in potentially explosive atmospheres. With a thin and light form factor, multiple usage modes, and Thunderbolt 4 technology, the K120-EX makes all kinds of data collection and communication fast and efficient, while an optional RS232 port supports legacy equipment, helping to extend lifecycles and streamline field operations. Contact Getac for more information.
