

### FLEXIBLE COMPONENTRY

DRUSEIDT ELECTROTECHNIK manufactures a wide range of world-class flexible componentry for high current transmission. From the smallest ground or earthing tape up to high current cables with 6000mm<sup>2</sup> conductor, almost all conceivable applications are covered. Contact DT Jointing Solutions for more information. ↙

### RELIABILITY GUARANTEED

Genelite has now introduced reliability guaranteed automatic transfer panels to support generators; with more than 30,000 units sold. These automatic panels are required to run a standby generator and thereby control all the functions for your generator. In the event of a blackout, an ATS will automatically command the generator to backup the house. It is a very popular and necessary accessory to add to an auto start generator for mains power backup. The fully integrated controller is designed for practical functionality, with LED indicators and digital push buttons for ease of operator use. Genelite also offers an extensive range of manual transfer and distribution boards. Contact Genelite for more information. ↙

### IMPROVE YOUR BASE LAYER

ArcTech Merino thermal under-garments and headwear feature a fire retardant, merino wool/viscose blend fabric, which has been developed for those working in hazardous conditions. This merino blend has excellent fire retardant properties while retaining a soft comfortable feel. These under-garments can be worn under other arc-rated workwear without compromising the fire retardant properties of the outer layers. When combined with arc-rated outer-garments the level of arc protection is greatly increased. In recent tests the combination of ArcPro Lightweight PPE (8.9 cal) and ArcTech Merino (8 cal) achieved a 27 cal/cm<sup>2</sup> rating. Contact Jaedon for more information. ↙

### CEC APPROVED INVERTERS

The Solis CEC approved Inverter range differs from other inverter manufacturers by offering different types and configurations in the typical power range. Solis manufactures Single Phase Inverters with one or two MMPTs (Maximum Power Point Tracking), Three Phase Inverters with dual MMPTs, and Hybrid Storage Inverters with 2 MMPTs and a specific battery. Contact One Stop Warehouse today to find out about pricing! The Solis-3P(5-20)K-4G-AU is a 5-20kW Three Phase Inverter with 2 MPTTs. This inverter is showcasing the developments of inverter technology, function, and appearance. This series supports 24 hour consumption monitoring with a smart meter, Wi-Fi connectivity and monitoring app for smartphones to oversee performance. With efficiency ranging from 98.3 per cent to 98.7 per cent, it is one of the most efficient residential inverters on the market. Contact One Stop Warehouse for more information. ↙
