

Steel brush straps for cleaning and abrading cable

Description: Flexible strap with steel brush bristles.

The brush straps are:

- Very tough construction
- Long lasting
- Easy to use
- Easy to clean.
- Highly abrasive.
- Resistant to rusting
- Use with two hands

They are ideal for:

- Abrasion of cable sheaths & applied heat shrinks tubes
- Cleaning copper or aluminium conductors including overhead lines
- Polishing metal surfaces or abrading plastics

Abrading cable sheath and applied heat shrink tubes have never been easier. These brush straps will abrade cable sheaths and heat shrink tubes effectively so glue lined heat shrink, and mastic tapes will be able to adhere effectively.
