

THERMAL CAMERA CORE

From DT Jointing Solutions comes the MICO212A infrared camera core, which offers plug-and-play integration for drones with 256x192 resolution and an optical lens, ideal for detecting solar panel temperature anomalies. Its compact and lightweight design ensures efficient performance while maintaining low power consumption, making it perfect for cost-effective solar farm inspections. With easy installation and reliable thermal imaging capabilities, the MICO212A is an essential tool for solar farm owners looking to enhance their monitoring solutions. Upgrade your drone systems today with this innovative thermal camera core. Contact DT Jointing Solutions for more information.

SECURE PEACE OF MIND

Introducing Lock-A-Bolt, the ultimate safety device for high-voltage isolations and industrial settings. Designed for reliability, it prevents unauthorised access to cabinets secured by bolts or Rittal locks, ensuring a safe workspace in industrial and electrical environments. Made from durable 304 stainless steel and available in painted red, Lock-A-Bolt offers enhanced safety during high-voltage isolation and can be installed in under a minute without specialised tools. Its tamper-resistant design protects against interference, helping to prevent electrical incidents. Whether for high-voltage apparatus or standard cabinets, Lock-A-Bolt delivers robust security, flexibility, and peace of mind in any demanding environment.
