## CUTOUT- MOUNTED RECLOSER

A new spur protection strategy using S&C's TripSaver II Cutout-Mounted Recloser can dramatically improve the way your utility responds to 80% of faults. When a fault occurs, this smart grid solution eliminates momentary outages for customers on the main feeder by only blinking the affected spurs. This approach saves money for the utility and its customers while improving reliability for all. For more information contact S&C.

## EXCLUSIVE PARTNERSHIP

Amplitude is proud to announce its exclusive partnership with American manufacturer Utility Solutions for Australia. Utility Solutions designs and manufactures tooling for overhead and underground construction and maintenance activities, which includes Shotgun, Telescopic, and Insulated Sticks, OH Operating Accessories, Stick and General Tooling Cleaning Products and Liveline Load Breaking Tools. In consultation with industry experts in the USA and abroad, Utility Solutions are constantly developing innovative products to ensure your workers can perform their tasks safely and efficiently. Contact Amplitude for more information.

## EASY, EFFICIENT, EXTRAORDINARY

The E series Tool-like Thermal Camera provides two configuration options of 120x90 and 256x192 IR detectors. It adopts the new real-time IR-Perfclear technology to enhance the details and reduce noise of the image and present a clearer image in real time. Equipped with a series of professional functions such as 2MP visible light camera, video streaming and recording, WIFI, and OTA upgrade, etc., E Series brings a clearer, more powerful and smoother work experience for users. Contact DTJS for more information.

## COVERED CONDUCTOR

Good news for residents in Balnarring, Victoria, as parts of the bare wire distribution network have now been upgraded with Amokabel's New Generation Covered Conductor. The Amokabel Covered Conductor will ensure that the local community now has a much-increased reliability of electricity supply, as well as reducing the risk of fire ignition and injury to both people and wildlife. The roll-out of Amokabel's New Generation Covered Conductor is gathering pace across Australia as more and more DNSPs recognise its unique ability to reduce their costs and provide a safer network for our communities and wildlife. Contact Amokabel Australia to learn more about how its New Generation Covered Conductor can help your network perform better.
