ADVANCED PROTECTION

Siemens 3WA & 3WT Air Circuit Breakers set new standards in power distribution, safety, and digitalisation, providing advanced protection for industrial and infrastructure applications. Designed for reliable performance, the 3WA breaker integrates seamlessly into low-voltage power distribution systems, offering high modularity, flexible communication via PROFINET and Modbus, and cybersecurity features to safeguard operations. The 3WT air circuit breaker provides a scalable solution with remote diagnostics, metering functions, and superior short-circuit protection, ensuring efficient power management for demanding environments. Both breakers are future-ready, supporting Industry 4.0 and smart energy monitoring to improve uptime and system transparency. Available from APS Industrial.
