BRAVE ENERGY

Brave is dedicated to delivering SaaS solutions for energy market participants. They provide market systems software for the entire meter-to-cash (M2C) lifecycle through a suite of modular solutions that work together. Brave strives to ensure customers remain compliant with evolving Australian energy market regulatory requirements. They automate business workflows, ensuring your business stays ahead of the curve. Brave has stayed ahead of the changing energy landscape for over 20 years, with solutions developed exclusively for the Australian energy markets (electricity and gas).
